

PhotoShop Advanced

PhotoShop Advanced course details

Duration: 1 Day

you will learn to

- Work with complex sets of colours, swatches, layers and gradients
- Use the path tools and commands to create and edit vector paths, use paths to create vector masks and clipping paths and use paths to create vector-based artwork
- Use painting tools, filters and blending modes to simulate different media, warp text and image layers, group layers and create Smart Objects and create layer comps
- Use the Actions palette to record, play, and edit actions, display actions as buttons and organize actions into action sets, and customise keyboard shortcuts and menus
- Prepare images for use in video productions, open QuickTime video content in video layers and edit video-frame content

the next step

Eager to learn more? We recommend:

- InDesign Introduction
- Illustrator Introduction

course dates

Visit www.TP3.com.au for our latest course schedule or call us on 1300 658 388.

This course is for people who want a chance to enhance their PhotoShop skills. In this course you will learn how to work with advanced image handling tools and features available in Photoshop.

The learning process

Before the course

We recommend this course as the next step from our PhotoShop Introduction program, or for those with equivalent knowledge of things such as selecting parts of images, layers, filters, painting tools, contrast and colour balance.

Our Training Needs Analysis survey is available to help you determine which level of training is most suitable for your level of experience with this application. To access this contact us on 1300 658 388.

Prior to commencing the training, we provide pre-course material to reflect on and align your learning outcomes to the course content.

During the course

You will work with advanced image handling tools and features available in Photoshop.

After the course

This course includes an associated eLearning course, containing similar content to the course delivered in the classroom. After completing the course, you will now be able to refresh your knowledge by logging on to the relevant eLearning course.

We also provide post-course telephone support whenever you require it.

"I will be taking away a lot more knowledge and time saving actions, which will be very useful in every aspect of my business. I am 100% happy with the course."

"Each student was given individual attention and the trainer made sure that everyone understood what they were doing. I have learnt several shortcuts that will enable me to perform my job quicker."

PhotoShop Advanced course content

- Filling image areas
- Gradients and patterns
- Layer overlays

Masks

- Mask channels
- Layer masks
- Grayscale masks
- Clipping masks

Vector paths

- Creating vector paths
- Editing vector paths
- Vector masks
- Paths for creative imagery
- Creative image effects

Creative image effects

- Painted effects
- Warping
- Efficient compositing
- Smart Filters
- Layer comps
- 3D layers

Video

- Images for video
- Video layers

Automating tasks

- Actions
- Organizing actions
- Batch processing
- Customizing Photoshop

Customising this course for your business

TP3 can provide a range of consulting services to better meet your business needs, including closed courses for your organisation, customised course material relevant to your industry and requirements, and blended learning solutions.

Training needs analysis

To ensure participants are booked onto the correct Desktop programs, we offer a survey tool that will align participants to the correct course for their needs, based on their experience using an application. Your client manager will work closely with you to ensure that all staff are booked onto the right programs and offer you the most suitable solution each time - whether this be public course training, group sessions, and any other alternate methods of delivery that could also work for you at the time - such as online learning or one-on-one coaching.

Prepare-learn-apply-measure

TP3 has led the way in measuring return on investment for end-user applications training. We have developed and implemented our in-house Prepare-Learn-Apply-Measure (PLAM) system to provide our clients with return on investment information to assist them in gauging the success of our learning and development initiatives.

Prepare: Pre-work

Reflecting on and aligning learning outcomes.

Learn: During the course

Focusing on relevance to on-the-job outcomes.

Apply: Post-work

Action plans and post-work encourage follow up.

Measure: ROI

Calculate and report on some aspect of return on investment.

CPD points

Many professional institutions, industry bodies and associations require their members to undertake continuing professional development (CPD). This course may be recognised as contributing to your CPD. Please contact your professional institution to find out more.

Employability skills for nationally recognised training

A summary of the employability skills developed through qualifications can be downloaded from <http://employabilityskills.training.com.au>
